

## Data at the service your mobility

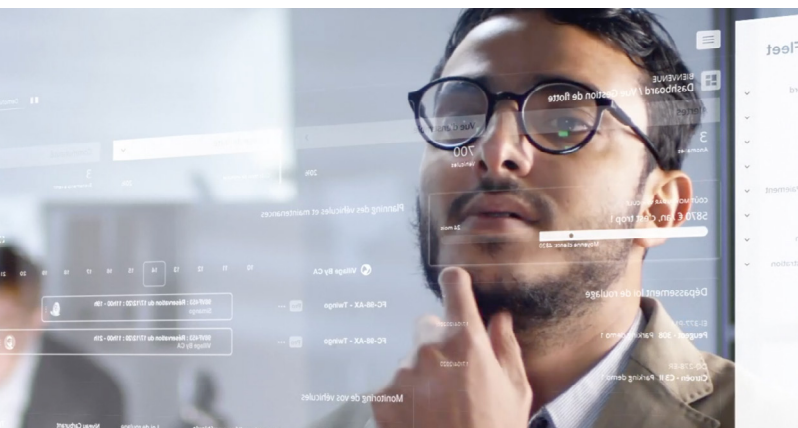

Do you want to be supported in bringing your vehicle fleet into compliance? Discover the **e-Fleet™** mobility analysis tool to better **quantify your uses** and start your **energy transition** today!

### A tool for the energy transition of your fleet

Faced with an increasingly demanding regulatory context and an obvious climate emergency, companies and local authorities have a fundamental role to play.

We have designed our e-Fleet™ solution to help them through this period of change.

An analysis tool where data will become your best ally to better understand your fleet, identify good and bad uses, reduce your carbon footprint and optimise your daily productivity.

**Meet the requirements of anti-pollution regulations.** Regulations encourage the introduction of low-emission vehicles for travel, especially in cities. e-Fleet™ supports you in this transformation.

**Green your mobility.** Identify which vehicles can be replaced by electric with the e-Fleet™ convertibility score. Based on usage data, get an accurate view of which combustion vehicles can be replaced.

**Benefit from automatic feedback.** No more laborious and time-consuming logistics! Thanks to e-Fleet™, save time and productivity with the automation of part of your tasks. Average mileage, usage rate, battery level, etc. It's all there!

**Manage your mobility on a single platform.** Centralise all the information about the vehicles in your fleet on a single management platform. Combine your offer with car-sharing easily with our complementary e-Colibri™ solution.

**Be supported in your project.** Benefit from the expertise of our team to help you, from the definition of your needs to the analysis of the results, in the transformation of your professional mobility!

# The elements of the e-Fleet™ solution

## Management platform

- ✓ Vehicles **geolocation**
- ✓ **Convertibility** score
- ✓ Vehicles information
- ✓ **Statistics** module
- ✓ **Eco-driving** module

## Mobile application

- ✓ Application for **employees**
